Subject CANTEEN LAKE

Gary, on July 28, Kathy Andria of the American Bottom Conservancy called me. You were at least one of the public meetings in 2002 that she attended.

One of the questions she had in the recent phone call was whether cadmium concentrations in Canteen Lake came from the Old American Zinc Plant Site. I looked up Canteen Lake, and it appears to be about a mile and a half NW of the Site.

At this point, I don't think I have enough information to answer her question.

For our August 24 visit to the Site, please plan to include Canteen Lake in the overall inspection/tour of the Site and nearby areas. I at least want to verify where Canteen Lake is in relation to the Site.

Thanks.
